# Build a Structure Inspired by the Book!

## Materials

Ask participants to save and bring cleaned, recycled items they have on-hand. Add cardboard, cardstock, aluminum foil, pipe cleaners, Popsicle sticks, glue sticks, tape, yarn, paper, etc. to increase creativity.

## Steps

- 1 Break participants into small groups (3-6 depending on size of group).
- 2 Give each group 5 minutes to brainstorm what they will be build. Prompt them to consider shape, texture, materials and function. How would the featured architect or architectural concept apply to their their design?
- 3 Allow groups access to the materials and start building either individually or as a group. (20-30 minutes).
- 4 Reflect on the build/s. Use the suggested reflection ideas in the next the next column or create your own.

Architecture by the Book® was inspired and developed by AIA Central Valley and is powered by CAF in collaboration with AIA California architecture firms and grant from the AIA College of Fellows.

## Reflection Suggestions

- Ask participants to share their build with group. What do they love about it? What was challenging?
- Display the finished builds together. Reflect on the differences in approaches and materials.
- Ask participants to share their inspiration for their build. How did they apply it to their design?
- Select a build and sketch it on paper from a chosen point of view (side,top, front). How did drawing reveal its design?
